PROJECTS

CanteenIQ | Multi-Tenant Canteen Feedback & Analytics Platform

- Engineered a full-stack **multi-tenant feedback platform** using React, Node.js, Express.js, MongoDB, JWT, and Recharts to manage canteen-specific student feedback and analytics.
- Implemented **QR-based feedback access, canteen lifecycle management, role-based authentication, tenant isolation, and server-side authorization**, preventing cross-canteen data access.
- Built responsive **Student & Admin dashboards** with rating trends, food performance, feedback management, Excel export, Demo Mode, and deployed the platform using **Vercel, Render, and MongoDB Atlas**.

Finance Intelligence | AI-Powered Personal Finance Platform

- Built a full-stack **personal finance platform** using HTML, CSS, JavaScript, Node.js, Express.js, MongoDB, and Chart.js, with Groq AI for **automatic expense categorization**.
- Designed **role-based dashboards** for Students, Salaried Individuals, and MSME Owners, with personalized financial analytics and **AI-powered spending insights**.
- Added **income and expense tracking**, interactive financial charts, and Profit & Loss statement generation for MSME users, and deployed the application using GitHub Pages, Render, and Vercel.
